23. Problem: (use additional Sheets if necessary)
The ECS VDB maintains verification status of L3 requirements verification criteria to which L3s are mapped. L3 requirements are verified through test, RVAR, or inspection. This CCR implements the verification status of the following criteria and the L3 requirements mapped to these criteria:
- 55, 137, 210, 211, 212, 667, 1055, 1264, 1360, 1374, 1439, 1440, 1444, 1445, 1448, 1989 (16 Landover EVRs).

24. Proposed Solution: (use additional sheets if necessary)
Update the ECS VDB to implement verification status for the criteria specified in Section 23 (above) and the L3 requirements mapped to these criteria. The criteria were statused via EVRs as described in the hard copy attachment.

25. Alternate Solution: (use additional sheets if necessary)
None.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Verification status of L3 requirements satisfied through test, RVAR, or inspection are maintained in, and provided throughout, the ECS VDB. If this CCR is not approved, then updated verification status of the criteria addressed in the attached EVRs and L3 requirements mapped to these criteria will not be available in the VDB, thus jeopardizing L3 requirements satisfaction.
